

## Responsible Visitor Charter

***Help us in our efforts to make a difference to the planet's environment whilst you are with us, a little goes a long way***

- Watch the water; turn off taps when brushing your teeth. Let us know you wish to reuse your towels as explained on the green foot laid on your bed
- Be energy aware, please turn off your air conditioning unit and lights when you leave the room and be mindful of these when in your room
- Kindly bring your recyclable waste to the front desk where we will be happy to dispose of it in our recycling bins
- Consider the environment, London's transport network is unlike most UK cities, Wandsworth has transport connections to all local business parks and attractions as well as excellent connections into Central London – please ask us for directions at the front desk
- Transport for London has just opened a Bicycle Superhighway running right through Wandsworth to Westminster, check the guide in our lift lobby for more details – we support this by offering all of our guests complimentary bicycle storage during your stay
